CLIENT TESTIMONIALS

“

This team was such an amazing find. I have been looking for a team to help me with projects that are above my skill level for website development and they hit the mark. I plan to use them each and every time I have a project. Take a chance, use them.

Rob Jensen
Provo, United States

“

Excellent to work with! I would recommend highly. They are very knowledgeable, easy to communicate with and work hard to find a resolution.

Estefano d'Elano
Hesse, Germany

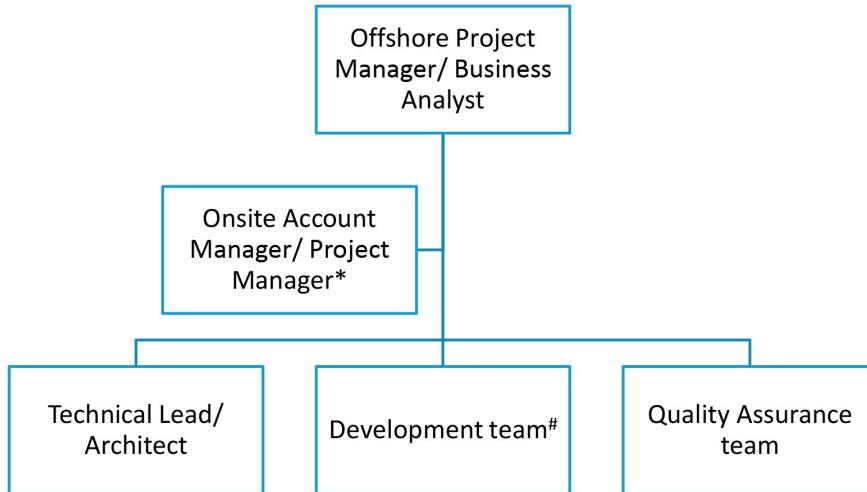

“

The professionals at Deaninfotech have been instrumental in providing high quality professional web design and development. They will not disappoint you!

Christine
Victoria, Australia

”

OUR PROJECTS

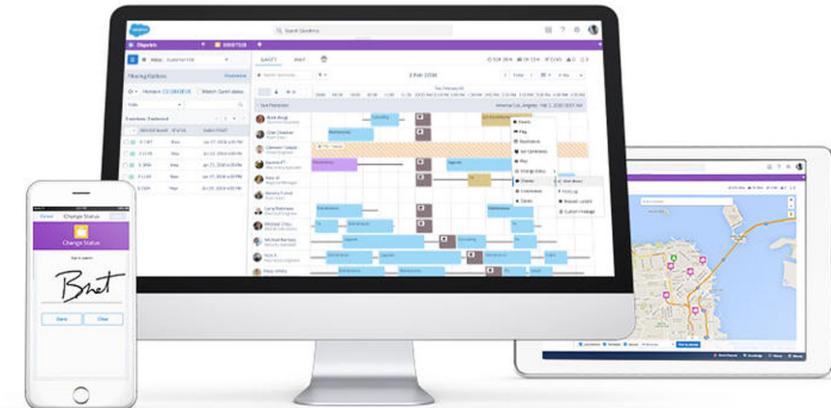

Akcea Therapeutics is a development and commercialization company focused on helping patients living with serious and rare diseases. We have configured and implemented the Salesforce Health Cloud to manage their patients and services. We have integrated the zoom conference, patient card configuration, custom reports and many custom objects like lab results and observations, medical history, insurance, diagnostic, medication history, care plan templates within their system.

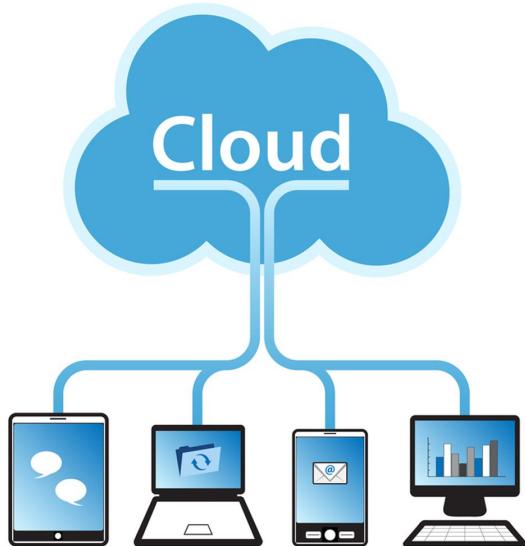

Hulft is a very popular name in Data logistics & Modernized industries, USA. They sell software called HULFT Integrate that allows a customer to write integration workflows with an iconic programming language. Each icon performs some database operation such as extracting data from a database or filtering records or changing that data. We built an "icon" (adapter) for interacting with salesforce that they can sell in the United States. Adapter supports SOAP API versions 7.0, 14.0, 18.0, 23.0, 26.0, 29.0, 34.0 and userid + password + token login, or OAuth 2.0 for those APIs which support it.

Laurentide Controls Ltd. is the recognized leading provider of automation, measurement, process control, and reliability solutions to industries in Eastern Canada. We have configured the Field Lightning Service within their Salesforce system. We created the service reports in which we have added the work order details and their line items so that document can be treated as Invoice. Amount is mentioned in it with other financial details. They can also preview the report and send it to customer directly.

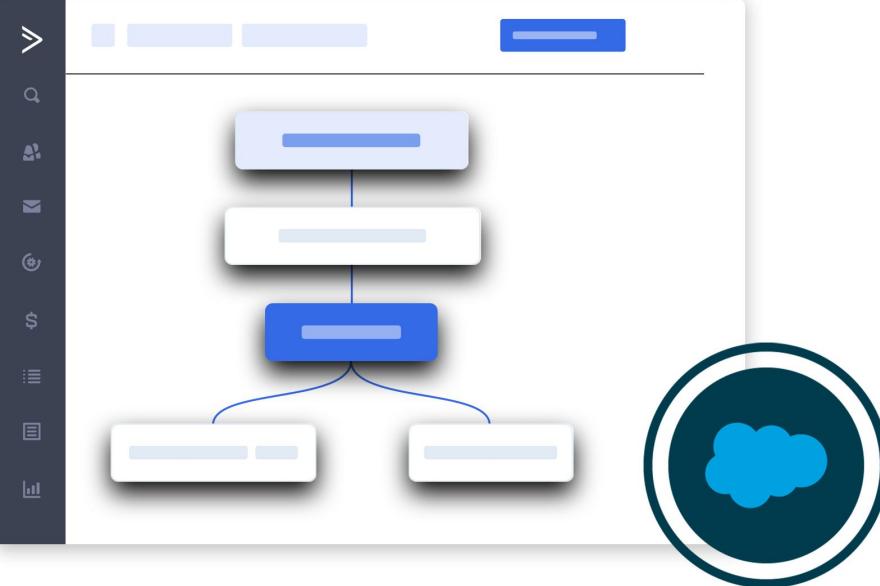

We have simplified their app configuration process by skipping the entire external app configuration, OAuth, client id, client key steps. We have also developed the custom reports for SF lightning and custom object in SFDC to store the lead-account-contact relationship within their app which match SFDC leads to accounts with-in SFDC. We have also built matched leads to run attribution reporting and lead routing.

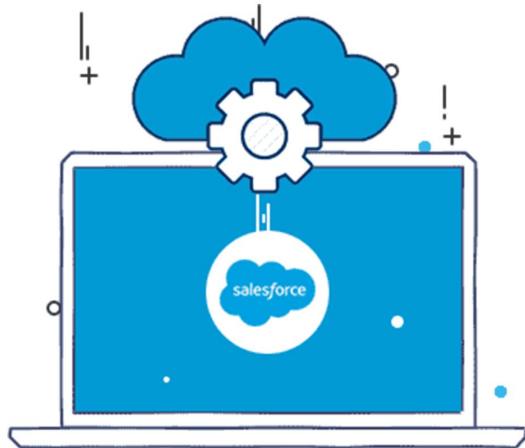

Avistone is a commercial real estate investment firm specializing in the acquisition and operation of multi-tenant industrial and business parks nationwide. We have built the functionality to send the leads from client's wordpress website to act-on account using gravity forms and then sync the leads data from act-on to Salesforce. Some rules were applied on each step.

ChefHero is an online platform that allows businesses to order wholesale restaurant supplies from a network of dedicated regional suppliers. We have built the function to sync the Salesforce accounts and contacts with active campaign system and set up this as a recurring task to update the data frequently.

Sorgente is the medical service providers in Italy. We have imported the leads from the multiple excel sheets into Salesforce account, built different email templates within Salesforce and integrated web to lead form on their .Net based website to Salesforce. We have integrated SF knowledge base with client's website.

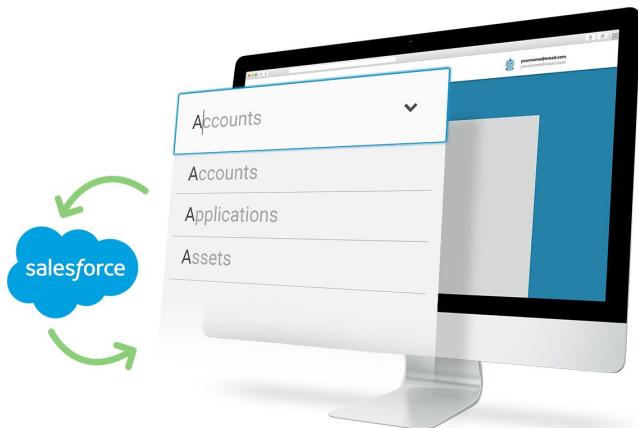

PINS

We integrated web-to-lead with Wordpress Gravity form plugin to generate leads from client's website to salesforce. This client has essential license.

RESOURCESOLUTIONS

We have provided the functions to import accounts and contacts from CSV files to SF if records not exist. Else update these records
